SUMMARY

I 'm a Fresher Developer with nearly 1 year of experience (including 4 months of experience as a web development intern at FPT Academy) with good knowledge of **Object-Oriented Analysis and Design, Database Design, SOLID principles, and Design Patterns.**

TECHNICAL SKILLS

- **Programming Languages:**
 - Java
 - C#
 - Python
 - JavaScript, HTML5, CSS3
- **Frameworks/ Platforms:**
 - Spring
 - ReactJS
- **Database Management Systems:**
 - PostgreSQL
 - MySQL
 - MongoDB
- **Others:**
 - Proficient in SQL queries.
 - Good understanding of **OOP methodologies, SOLID principles, and design patterns.**
 - Good understanding of the **Agile and Scrum** development process.
 - Have experience with Webserver (Tomcat), API documentation (Swagger).
 - Have experience with Cloud Computing Platforms: Azure & Google Cloud Platform.
 - Experience in setting up CI/CD pipelines.
 - Good understanding of **RESTful APIs and microservices architecture.**
 - Good understanding of **REST and SOAP web services.**
- **Version Control:**
 - Git, SVN
 - Jira
- **Foreign Languages:**
 - English (Intermediate)
 - Vietnamese (Native)

EDUCATION

FPT University Ho Chi Minh (Vietnam)

From 09/2018 to 11/2023

- Studying Software Engineering
- Degree grade: Good
- Outstanding new student of 2019
- Chosen as the **Team Leader in the Capstone Project.** My Capstone project was among the highest-scoring groups that semester.

KDU Penang University College (MY)

From 07/2019 to 09/2019

- Studying English
- Degree grade: Good
- Students perform excellent course activities

PROFESSIONAL EXPERIENCE

FPT University Ho Chi Minh | ALS Vietnam

06/2023 – 10/2023

Position: Software Engineer (Back-end Developer) - Leader

Project: ALS Vietnam (6 members)

- **Project Description:** A free website providing information about the disease ALS (Amyotrophic Lateral Sclerosis). The purpose is to help improve community knowledge as well as help ALS patients in Vietnam have more useful information.
- **Technologies used:**
 - Front-end: HTML5, CSS3, ReactJS, Firebase
 - Back-end: **Spring Boot, RESTful APIs, MS SQL Server**
- **Responsibilities:**
 - Receive project resources, communicate with customers and stakeholders to clarify project requirements.
 - Develop a detailed plan for the project, resources, and activities required to achieve project completion.
 - Team leader, motivate team members, assign tasks, monitor work progress, and resolve problems that arise during the project.
 - Monitor project progress, ensure that activities are carried out according to schedule, and provide solutions to problems that arise.
 - **Configure a new back-end server for the project.**
 - **Be a ReactJS framework instructor for team members.**
 - **Design UX/UI and implementation for payment solutions based on customer requirements.**
 - **Fix the error of not being able to create new posts.**
 - **Fix errors on the website interface (font, text spacing, line spacing, alignment, text ratio, image size, and text size).**
 - **Fixed error with image saving function on Firebase.**
 - **Refactoring the project's back-end source code helps improve the project's maintainability and development capabilities.**
 - Write important technical documents of the project and provide comments for project development.

FPT University Ho Chi Minh | Reso Vietnam

08/2022 – 01/2023

Position: Software Engineer (Back-end Developer) - Leader

Project: CongDongChungCu (**Capstone Project** – 4 members)

- **Project Description:** The system provides ordering and delivery services within the apartment complex, including a system homepage, a mobile application for delivery people, an application for users, and an application for stores. Goods - buy/sell at your fingertips.
- **Technologies used:**
 - Front-end: HTML5, CSS3, ReactJS, Flutter, Firebase
 - Back-end: **RESTful APIs, Web API, MS SQL Server**, Entity Framework, NodeJS
- **Responsibilities:**
 - **Receive project resources, communicate with customers and stakeholders to clarify project requirements.**
 - Develop a detailed plan for the project, including the schedule, resources, and activities required to achieve project completion.
 - Divide and manage human resources to ensure project are carried out on schedule and in accordance with the abilities of team members.
 - Team leader, motivate team members, assign tasks, monitor work progress, and resolve problems that arise during the project.
 - Monitor project progress, ensure that activities are carried out according to schedule, and provide solutions to problems that arise.

- Calculate and evaluate possible risks in the project, plan to minimize their impact.
- **Design UX/UI and implement the solution** (both back-end and front-end) based on the requirements of stakeholders.
- **Design database schema** for the system and implement front-end services for the user app, delivery person app, and CongDongChungCu website.
- **Master data management, including creating, updating, and deleting data.**
- **Analyze data quality assurance.**
- **Manage users and user roles.**
- **Define the architecture and coding convention for the project.**
- **Implement additional functionalities for the delivery algorithm.**
- **Implementing third-party services such as notification messaging, payment, and image storage.**
- **Set up CI/CD for backend and frontend (deploy) using Azure Services.**
- **Collaborate with team members, mentors, and stakeholders to define and improve team workflows, resulting in a 30% reduction in new functionality deployment time and configuration-related errors.**
- Manage project resources, prepare documents, test software, and present.

FPT Academy Ho Chi Minh

09/2021 – 11/2021

Position: Intern Developer (Back-end Developer) - Leader

Project: Quizlet (6 members)

- **Project Description:** An online learning system that allows users to create questions and answers. The purpose of the system is to help users review and study.
- **Technologies used:**
 - Front-end: HTML5, CSS3, JavaScript
 - Back-end: **Spring Boot, MS SQL Server, RESTful APIs**
- **Responsibilities:**
 - Receive project resources to clarify project requirements.
 - Develop a detailed plan for the project and activities required to achieve project completion.
 - Divide resources to ensure project are carried out on schedule and in accordance with the abilities of team members.
 - Team leader, motivate team members, assign tasks, monitor work progress, and resolve problems that arise during the project.
 - **Practice working with Spring Framework.**
 - **Be a GitHub instructor for team members.**
 - **Design UX/UI and implement the solution (both back-end and front-end) based on the requirements of the instructor.**
 - **Design database schema for the system** and implement back-end services for the project.
 - **Develop and fix errors in the quiz function.**
 - Prepare documents and product presentations for mentor interns.
